

FACT SHEET

COMPANY OVERVIEW :

Life Safety Services is the National Leader in Fire and Smoke Damper inspection services. The National Fire Protection Association (NFPA) as well as other regulatory agencies require inspection of fire and smoke dampers for specified intervals — Life Safety Services' damper testing helps our clients in meeting compliance standards.

By specializing in the inspection of fire and smoke dampers and working coast-to-coast, our project managers and technicians are highly experienced in the testing process and the nuances involved in working in varied facilities such as hospitals, manufacturing plants, and pharmaceutical facilities. This experience, knowledge, and professionalism are mandatory when dealing with the critical importance of NFPA's Life Safety Code®.

LEADERSHIP:

- Craig Rutledge, MBA, ASCS, CIE, CMR
- Jack Meredith, ASCS, CMR

MISSION STATEMENT:

"Our mission is to create solid partnerships with facilities throughout the nation by providing specialized inspections of the highest quality to ensure compliance with NFPA's critical Life Safety Code®."

OPERATING STRATEGY:

- Understanding the true meaning of NFPA's Life Safety Code** — Our goal is to help our partners understand that fire and smoke damper inspections are not to be completed simply because of "Code" — their purpose is to minimize the danger to life from fire.
- Provide the most thorough inspection in the industry** — We will locate and operate (i.e. actuate) every damper in the facility, removing and resetting the fusible link and replacing when necessary, to verify that the damper fully closes and is in working order.
- Digitally document all facets of work performed** — Life Safety Services will document every damper in the "open" and "close" position to provide our clients' with peace of mind that all dampers were inspected and are in proper working order.
- Putting our clients' needs first** — Life Safety Services understands that all healthcare facilities and other facilities with critical care areas require strict Infection Control Procedures and we will come prepared to follow all procedures in place. If there is not an Infection Control Procedure in place, we will enforce our own to ensure the health and safety of others.

ADDITIONAL INFORMATION:

- Performs fire and smoke damper inspections in all fifty (50) states as well as Puerto Rico, Canada, and Mexico
- Performs fire and smoke damper inspections in over 200 facilities per year
- Inspects over forty—thousand (40,000) dampers per year
- Trains their project managers and technicians in infection control procedures to utilize while working in healthcare facilities
- Has been told by multiple Joint Commission consultants and multiple United States Department of Health and Human Services Life Safety Code inspectors that our fire damper inspection reports are the most thorough they have seen
- Life Safety Services is a member of NFPA, ASHE, IAQA, and NADCA

Fire and Smoke Damper Inspection Company Launches New Website

LOUISVILLE, Ky. (November 14, 2007) – Life Safety Services (LSS), the National leader in fire and smoke damper inspection services, launched its new informational website today displaying an in depth review of their services. The site features information regarding the National Fire Protection Association’s (NFPA) Life Safety Code® and the overall importance of fire and smoke damper inspections as part of the commercial facility’s Life Safety Plan.

The new home page introduces visitors to the regulatory agencies that enforce code compliance such as Underwriter’s Laboratory (UL), the Joint Commission and the International Code Council (ICC). The online visitor has immediate access to the website’s major topic areas that allow browsing through information in regards to the services that LSS has to offer in ensuring compliancy.

Improvements to the website include:

New Look – Improved graphics and cleaner layouts provide guests with an enhanced user experience.

Enhanced Navigation – Web pages are structurally organized, making it easier for visitors to find what they are looking for and know where they are within the site.

Improved Site Features – Some new features on the website include news and event notices and up-to-the-minute RSS feeds from other highly recognizable entities throughout the industry. Pertinent public relations information about Life Safety Services is now immediately available via a contact form on the website and literature regarding fire and smoke damper inspections is now clearly archived on the site for review. The website also includes the ability for current clients to login and retrieve their inspections in electronic format. A blog has been added to keep current and

potential clients up to date with the growth that Life Safety Services is currently experiencing.

Life Safety Services recruited another Kentucky based company to display their new website. Ryan Matteson of Louisville Web Group created a website that truly enhances the services that Life Safety Services has to offer to the Facilities Management industry. The design and layout of the new site was created to set the company apart from its competitors and to reinforce the company's ultimate goal in staying the industry leader in fire and smoke damper inspection services.

In 2004 and Craig Rutledge and Jack Meredith saw an opportunity to put their expertise in the fire and smoke damper inspection business to work by forming Life Safety Services (LSS). By specializing in fire and smoke damper inspections, LSS provides inspection services to facilities at an affordable price. Life Safety Services is has become one of the top fire and smoke damper inspection companies by providing outstanding customer service and maintaining a staff of highly trained project managers and technicians.
